

## BASSO 880

### **Indiana Line – an Italian brand with traditions**

Indiana Line is one of the leading Italian brands offering loudspeakers and installation speakers, with a tradition dating back to 1977. The goal of the Indiana Line engineers and designers has always been the highest quality of workmanship and the rational use of components at the same time. All this in order to achieve sound

qualities that go far beyond the technical parameters achieved by competitive models offered in a similar price range.

### **Basso subwoofers – the power of bass**

Basso is a line of active subwoofers with great acoustic possibilities, suitable for stereo and home theater systems. The models belonging to it improve the dynamic range of the loudspeakers by increasing the amplitude of bass in the reproduced signal. The neat and subtle cabinet design of the Basso models makes it easy to match the subwoofers with other audio equipment and hide these woofers among any interior design. Basso subwoofers are finished in matte black vinyl.

### **Basso 880 and sealed cabinet**

The 275 mm woofer used in the Basso 880 model is placed on the bottom, using the floor in order to further deepen the bass. The Basso 880 uses a sealed cabinet, known for its excellent impulse characteristics and very low cut-off frequency. Thanks to this, the subwoofer is able to generate

exceptionally quick and extremely low-reaching bass, which fantastically completes the sound of the loudspeakers in the lowest, difficult to process range of acoustic frequencies with its potential.

### **Class D subwoofer**

The design of the Basso 880 uses a 300 W class D amplifier, which, despite its high power, is characterized by lower energy consumption than the weaker class AB units. It is equipped with a complete control section including crossover frequency and gain controls, and a phase switch. This allows the subwoofer to integrate seamlessly with other audio system components and the listening room.

### **The most important features of the Basso 880 model:**

- 275 mm woofer
- Sealed cabinet
- Class D amplifier
- Finish: black matte vinyl
- Frequency response: 24 to 180 Hz
- Crossover frequency: from 40 to 180 Hz
- Supply voltage: 220 - 240 V
- Nominal / maximum power: 250 W / 400 W
- Maximum power consumption: 300 W
- Standby power consumption: less than 0,5 W
- Dimensions (H x W x D): 385 x 300 x 320 mm
- Weight: 13,4 kg
