

DIVA 752

Indiana Line – an experienced Italian brand

Indiana Line has been famous for producing loudspeakers since 1977. The optimized production process and the rational use of components distinguish this brand from competitive solutions, which results in above-average quality of workmanship and sound.

Let yourself be surprised by the sound smoothness that is difficult to achieve

The two-way center speaker of the Diva 752 ensures enviable resolution and naturalness in voice reproduction, with a quick and precise impulse response. Warm and deep bass is the ideal completion to natural, yet detailed high frequencies. This design is perfect for a high-quality home theater system consisting of Indiana Line Diva speakers.

Trust many years of experience in creating loudspeaker technology

The Diva 752 tweeter is attached to the loudspeaker through a soft rubber cover, which significantly reduces vibrations transmitted from the cabinet. It has been equipped with a radial rear chamber that uses two different types of sound damping materials.

The stiff and light cones of the mid-woofers are made of Curv material – a woven, extruded polypropylene with high damping. The magnet system uses an aluminum ring which reduces non-linearities, maximizing resolution also at high volume levels.

A great completion for a home theater system

The Diva 752 has amplifier loading impedance between 4 – 8 ohms, and the dedicated amplifier power is 30 – 140 W. The loudspeaker can be put

even close to the wall, thus taking advantage of the bass boost thanks to the bass-reflex tunnel placed at the back of the cabinet. By using this model, together with other Indiana Line speakers from the Diva series, you can create a complete home theater system.

Be mesmerized by industry-leading design

The Diva 752 center speaker is finished in an elegant high-gloss black lacquer. Thanks to the stylish design of this model, as well as other Indiana Line Diva loudspeakers, it will perfectly integrate in any interior.

The most important features of Diva 752:

- 2-way central speaker
- Crossover frequency: 2,2 kHz
- 2 x 140 mm mid-woofer with Curv cone
- 26 mm silk dome tweeter
- Bass reflex cabinet with a port at the back
- Frequency response: 50 Hz to 22 kHz
- Black piano lacquer finish
- Suggested amplifier power: 30 - 140 W
- Sensitivity: 91 dB (2,8 V / 1 m)
- Dimensions (H x W x D): 160 x 420 x 270 mm
- Weight: 7,8 kg
