

## TESI 261

### **A respected manufacturer of loudspeakers from Italy**

Indiana Line is one of the most important Italian brands producing loudspeakers, and its traditions date back to 1977. The business goal has always been the highest quality of workmanship obtained with the use of carefully selected components. This made it possible to achieve sonic qualities that exceed the design possibilities available in this price range.

### **Tesi – in Italian style**

The rounded edges of the Tesi Indiana Line speakers are the essence of the brand's Italian style. The aesthetic vinyl with which the columns have been finished is available in two colours – light walnut and black oak. The appropriate colour variant allows you to match the speakers to the arrangement of the room. What is important, the models from the Tesi series not only look great, but also amaze with their sound – extremely mature for the price range in which they are offered. The amplifier loading impedance between 4 – 8 ohms allows for good efficiency, and at the same time is not a problem for amplifiers and receivers manufactured nowadays.

### **2-way front ported bookshelf speaker**

The Tesi 261 by Indiana Line is a 2-way bookshelf speaker with a 26 mm dome tweeter and a 160 mm high dynamic mid-woofer. The bass reflex port in this model is located at the front baffle, which makes it easier to place the loudspeaker in the listening room. Tesi 261 is a model designed for

medium-sized rooms (up to 20 m<sup>2</sup>). It will work great in a stereo system, especially where there is no room for large floorstanding speakers. The dedicated power of the amplifier to drive the Tesi 261 speakers should be in the range from 30 to 120 W.

### **Rationally selected components**

The cone of the mid-woofer is made of mica and polypropylene. The phase plug with which it is equipped allows for a detailed sound of the midrange. The tweeter with a silk dome, a neodymium magnet and a special radial rear chamber has been located in a specially profiled front, relatively close to the woofer. The applied solutions allowed to obtain open and clear treble. Moreover, air-coils and film capacitors have been used in the tweeter filter, additionally emphasizing the exceptional quality of the entire acoustical construction.

### **The most important features of the Tesi 261 model:**

- 2-way acoustical design
- Crossover Frequency: 2,5 kHz
- 160 mm mid-woofer
- 26 mm silk dome tweeter
- Bass reflex cabinet with a port at the front
- Frequency response: 45 Hz to 22 kHz
- Finish: black oak or light walnut
- Suggested amplifier power: 30 - 120 W
- Sensitivity: 91 dB (2.8 V / 1 m)
- Dimensions (H x W x D): 362 x 180 x 275 mm
- Weight: 5,8 kg
