

Tesi Q

Indiana Line – an Italian brand with traditions

Indiana Line was founded in 1997 in Turin. At present, it is one of the most important Italian brands offering loudspeakers and various types of installation speakers. The Indiana Line models are distinguished by the high-quality workmanship and the rational use of components. The designers and engineers have achieved sonic

qualities that go far beyond the parameters of competitive models offered in a similar price range.

Tesi Q – 2-way wall-mounted speaker

The Tesi Q is a 2-way wall-mounted speaker that has been designed for use in stereo and home theater systems. It uses the same components as in the classic series of the Indiana Line Tesi speakers. As a result, the Tesi Q maintains the same tonal quality. The design of this wall-mounted speaker uses a 26 mm dome tweeter and a 160 mm mid-woofer with a large linear excursion. Depending on the user's preferences and needs, the loudspeaker can be installed directly on the plasterboard (without the use of any additional accessories). When installing Tesi Q on brick walls, it is recommended to use the wooden cabinet included in the set.

Drivers from the Tesi series

The mid-woofer used in the Tesi Q model has a cone made of a mixture of polypropylene and mica, which gives it rigidity and guarantees precise

reproduction of micro-details. The phase plug located in the center of the membrane allows a wide dispersion of the midrange, which fills the listening room. The parameters of the driver allow for obtaining deep and dynamic bass (when operating wall-mounted), giving the music a rhythm and energy.

Thoughtful design of the tweeter

The tweeter with a silk dome, a strong neodymium magnet and a radial rear chamber has been placed as close to the woofer as possible in a specially profiled front panel. It provides open, and at the same time clear treble while perfectly blending with the mid-woofer. It is worth emphasizing that the tweeter filter uses only air coils and foil capacitors, which contribute to the refinement of the sound compared to competitive speakers.

The most important features of the Tesi Q model:

- The most important features of the Tesi Q model:
- 2-way acoustical design
- Crossover frequency: 2,5 kHz
- 160 mm mid-woofer
- 26 mm silk dome tweeter
- Frequency response: 65 Hz to 22 kHz
- Suggested amplifier power: 30 - 120 W
- Sensitivity: 90 dB (2,8 V / 1 m)
- Wooden cabinet included in the set
