

# NEW DIVA

Join us on a new chapter of  
Indiana Line brand history.

Are you a lover of good sound?  
Discover Diva 3 and Diva 5 speakers.

indiana line

---

## We created our best speakers to date.

You can hear a noticeable difference: crystal-clear treble, powerful, natural midrange, and well controlled bass. Individually crafted Curv membranes, proprietary Dual-Wave surround, mid-bass drivers in aluminum cast baskets, and a reinforced cabinet with a backwards-tilted front panel are just some of the solutions that make these speakers exceptional. Regardless of what music you like and what electronics you have, Diva will surprise you with its potential.

### Tweeter with a radial chamber and a profiled front

Saturates the room with high tones, ensures clear treble without coloration.

### Dual-Wave upper suspension

Prevents membrane resonance, reduces bass distortion.

### Curv membrane

Faithfully and naturally reproduces details, optimally dampens internal resonances.

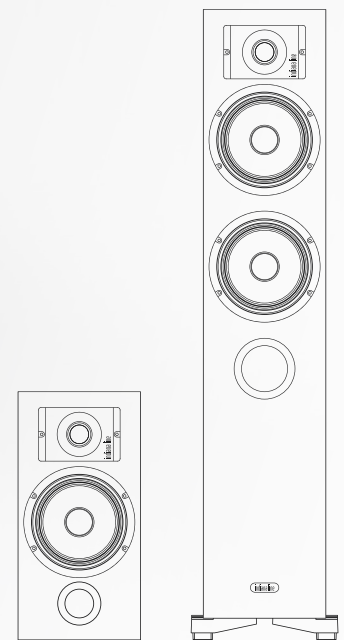

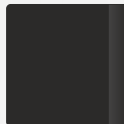

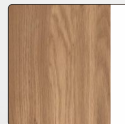

### Panel tilted backwards

30 / 25 mm thickness (floorstanding / bookshelf), prevents vibrations of the cabinet.

### Magnetic grille

Two finish options:

		<b>DIVA 3</b>	<b>DIVA 5</b>
system		2-way	2.5-way
suggested amplifier	W	30-100	30-130
impedance	Ohm	4-8	4-8
frequency response	Hz	45-23000	40-23000
sensitivity (2.83 V / 1 m)	dB	90	90
low-midrange transducers (diameter)	mm	150	150
high-frequency transducer (diameter)	mm	26	26
crossover frequency	Hz	3500	400 / 2800
dimensions (height x width x depth)	mm	335 x 166 x 320	857 x 200 x 275
weight (1 piece)	kg	6.1	13.1
